25 successful years with Oemeta

Bharat Fritz Werner Ltd is using the Coolant from Oemeta for almost 25 years on their WALDRICH COBURG SLIDEWAY Grinding Machine.

The company appreciates the close partnership at all times and highlights the performance of UNIMET AS 220 R.

UNIMET AS 220 R is a particularly efficient product that can be used for a large variety of machining applications and materials.

It has a outstanding skin compatibility, very good corrosion protection and is free from bactericide. Its high flushing action ensures cleaner machines and work pieces. UNIMET AS 220 R has very good foaming characteristics even with water hardness of 10°d and its high flushing action ensures cleaner machines and work pieces.

Letter of Appreciation from Bharat Fritz Werner Ltd

Bharat Fritz Werner Limited, popularly known as BFW, is India's largest machine tool builder. One of the flagship companies of the Kothari Group, BFW was incorporated in 1961 in collaboration with Fritz Werner Werkzeugmaschinen GmbH of West Germany.

Its current product portfolio includes CNC machining centers (both horizontal and vertical), milling machines, boring machines, special purpose machines and machining cells and lines. It caters to a wide variety of customers in India in the Automobile, Consumer durable, Aerospace, Defence, General engineering and Railway sectors etc.
